Hot-swappable Batteries: Constant & Mobile Power Supply

Help to eliminate power-related downtime and maximize power availability and productivity, given that there are enough charged batteries on hand. Quickly check the remaining battery power with just one click of the button on the battery.

RTK Aid Function: Uninterrupted Work

Work without interruption even when RTK corrections fail, powered by our RTK aid function.

8GB Internal Memory + TF Card Extension

The built-in 8GB internal memory and TF card extension slot allow more data storage for a longer time.

Rugged Design: Better Resistance to Shock and Fall

Use it for many years, thanks to its strongly made and capable of withstanding rough handling.

Advanced Long-Range Tx/Rx UHF Modem

Integrated with the long range UHF modem, the E600 is compatible with traditional major radio protocols. The maximum communication distance can reach 15 km with 2W transmit power in urban environments.

Max 60° Tilt Survey: A Different Way of Working

- Quickly measure accurate points while standing or walking without leveling the pole.
- Concentrate on where the pole tip needs to go, which is especially useful during a stakeout.
- Easily start a survey in environments that are hard to reach, such as building corners and slopes.
- No longer worry about the movement of the pole when measuring, provided that the pole tip is stationary.
